PROFESSIONAL SUMMARY

Results-driven Mechanical & Production Engineer with 5+ years of experience in manufacturing operations, production planning, and mechanical design. Proven ability to lead cross-functional teams, optimize production schedules, and deliver engineered solutions on time. Skilled in CAD/CAE tools, Excel-driven data analysis, and process improvement. Adept at balancing short-term execution with medium-term capacity planning in fast-paced industrial environments.

PROFESSIONAL EXPERIENCE

Lead Production Operations & Planning Engineer

Oct 2025 – Present

Virginia Transformer Corp | Roanoke, VA

- Managed competing priorities across an active backlog of transformer units using structured scheduling methodologies, improving on-time delivery rates.
- Monitored schedule adherence and identified production bottlenecks; developed and executed data-driven recovery plans to minimize delays.
- Maintained end-to-end visibility across the production pipeline by leveraging Excel dashboards and ERP data, balancing short-term execution with medium-term capacity planning.
- Presented schedule status, risk reports, and KPI summaries to senior leadership and project managers, driving informed decision-making at the executive level.
- Collaborated with cross-functional teams including procurement, engineering, and quality to ensure seamless workflow and resource alignment.

Production Supervisor

Nov 2024 – Oct 2025

Virginia Transformer Corp | Virginia, USA

- Reviewed and verified BOM sheets, production drawings, and manufacturing assemblies to ensure accuracy, efficiency, and compliance with quality standards.
- Improved manufacturing throughput and reduced per-unit downtime by implementing process improvements and standardized workflows.
- Led and mentored a team of production associates, fostering a culture of accountability and continuous improvement.
- Tracked production metrics using Excel to identify trends, flag inefficiencies, and report on departmental performance.

Mechanical Engineer I

Apr 2024 – Oct 2024

Phillips Safety Products Inc. | New Jersey, USA

- Assisted in the design, prototyping, and testing of safety devices, achieving a 20% increase in efficiency while ensuring compliance with cGMP and ISO 13485:2016 standards.
- Collaborated with engineering teams on design updates and analyzed performance data to reduce system downtime by 15%.
- Utilized SolidWorks to create detailed models and engineering drawings with GD&T, improving part fit and document retrieval efficiency by 20%.

Mechanical Design Engineer Intern

Feb 2024 – Apr 2024

MED-SIX Inc. | New Jersey, USA

- Conducted feasibility studies and design verifications for medical devices, ensuring accuracy and adherence to cGMP and ISO 13485:2016 standards.
- Executed test protocols using mechanical lab equipment, analyzed experimental data, and presented findings to project leadership.
- Maintained compliance documentation and trained new associates on protocols and equipment usage, enhancing team effectiveness.

Graduate Teaching Assistant

Sep 2022 – Dec 2023

New Jersey Institute of Technology | Newark, NJ

- Guided students in creating 2D and 3D mechanical drawings using AutoCAD and SolidWorks, driving higher comprehension of design principles.
- Leveraged 3D printing technology for rapid prototyping and product development in collaboration with the lab team.

Mechanical Engineer Intern

Aug 2019 – Sep 2019

Electronics Corporation of India Limited (ECIL) | India

- Designed and engineered a shock absorber using SolidWorks; managed its manufacturing process through 3D printing technologies.
- Utilized Excel and SQL to analyze sales and inventory data, providing insights that optimized pricing and inventory strategies.

TECHNICAL SKILLS

CAD / CAE: SolidWorks, AutoCAD, CATIA, Creo PTC (Pro-E), Autodesk Fusion 360, ANSYS Workbench, SolidWorks Simulation

Data & Productivity: Microsoft Excel (Pivot Tables, VLOOKUP, Dashboards, Data Analysis), SQL, LABVIEW, MS Office Suite (Word, PowerPoint, Outlook)

Manufacturing & Hardware: CNC Machining, Mills, Lathes, Arc Welding, Sheet Metal Fabrication, 3D Printing, Angle Grinders, Bandsaws

Engineering Expertise: GD&T (ASME Y14.5), FEA / FEM, Mechanical System Design, Material Selection, Sheet Metal & Plastics Design, Production Process Optimization

Management & Operations: Production Planning & Scheduling, BOM Management, Project Coordination, Team Leadership, Capacity Planning, ERP Systems, Risk Reporting

Standards & Compliance: ISO 13485:2016, cGMP, Product Validation, Quality Investigations

EDUCATION

Master of Science — Mechanical Engineering | GPA: 3.45/4.0

Dec 2023

New Jersey Institute of Technology | Newark, NJ

Relevant Coursework: Computer-Aided Design, Heat Transfer, Continuum Mechanics, Project Management

Bachelor of Engineering — Mechanical Engineering | GPA: 3.0/4.0

Aug 2021

Vasavi College of Engineering | India

KEY PROJECTS

Electromagnetic Energy Harvesting Device

- Developed a theoretical model and simulation to analyze an undamped system under harmonic forces; designed a device to charge a lithium-ion battery for a nerve stimulation device to alleviate foot drop symptoms.

Formula Racing Car — SUPRA | SAE

- Directed the development of a formula racing car for the Formula Supra competition using CATIA, Unigraphics, and ANSYS to ensure top-tier design and performance.

CERTIFICATIONS & MEMBERSHIPS

- Certification in Canter CADD — Specializing in CATIA v5, ANSYS, SolidWorks (2021)
- Introduction to Self-Driving Cars — Coursera
- Member, Society of Automotive Engineers (SAE), USA
- Member, American Society of Mechanical Engineers (ASME), USA — Credential ID: 20103819116
